

# Catawba College

## *Catawba Conservation Camp (C3)*

Ribbon of Hope grant funds were used to expand the Catawba Conservation Camp. The goal of this program was to provide underserved middle school girls with exposure to science and mathematics focused inquiry, investigation, and discovery via a one-week residential summer camp. Program activities included field work, lab sessions, and in-depth study of topics such as species and habitats, invasive species, pollution, over-population, and over-harvesting. The program reached a total of 74 girls who attended the summer camp. The request noted it was for bridge funding, after another source of funding had been depleted.
