

# Asheville Museum of Science

The 2019 Ribbon of Hope grant will support the educational programming expansion of a STEM program. The expansion will impact STEM programming for students in grades Pre-K to 12, implemented at the museum, at area schools, and in the students' communities reaching across ten counties. Project goals include building excitement for science, technology, engineering and math., and support for teachers and to prepare students to achieve in STEM subjects in school. Additionally outcomes are expected to expand the pipeline to 21<sup>st</sup> Century STEM jobs that support families in this region and beyond.
