

This Ribbon of Hope grant supported the implementation and expansion of the Assuring Better Child Health and Development (ABCD) project in Eastern NC through [Craven Smart Start, Inc.](#) The program trains physicians and their staff to perform routine developmental and autism-specific screenings of their young patients and to connect them with services. Too many young children with developmental-behavioral delays and physical-mental health disorders were not receiving needed intervention services before they entered kindergarten. The project is being implemented in a five-county service region: Craven, Lenoir, Greene, Pamlico and Jones Counties.
